

JOIN... THE **REBREATHER** REVOLUTION

PODEIDON MK VI

The world's first recreational rebreather!!!

It is fully closed, fully- automated unit that will make you see diving differently...

The system comprises a breathing loop(mouthpiece, hoses, counter lungs and backpack) with associated electronics module, and two independent gas cylinders. One contains compressed oxygen which is added to the breathing loop to compensate the oxygen consumed by the diver. The other cylinder contains compressed air as diluents to “fix” the compression in the breathing loop as the diver goes deeper.

With MK VI

- **Approach significantly marine life**
- **You can dive non stop 180 minutes**
- **Patented safety technology**
- **Plug and play system**
- **No bubbles**
