

If you want to be a recreational diver and gain your first dive certification, but you suffer from lack of time or money, Scuba Diver Program is an ideal choice for you!!!

Scuba Diver is a sub course of OPEN WATER DIVER course. This course requires less time in theory and in training dives in confined and open water, so results in a limited certification. But this level allows for vast diving experience to a maximum depth of 12 meters/ 40 feet. PADI Scuba divers are certified to dive under the direct supervision of a PADI professional.

Minimum program duration: 2 days. Completion and time depend on the degree of understanding and performance of the required theoretical knowledge and practical skills.

Scuba divers may at any time, easily and quickly, upgraded to Open Water Divers, following the necessary procedures of PADI.
